

Spark Plugs

- Tools Needed
 - 10 mm socket
 - 5/8 inch spark plug socket
 - Socket wrench with extension
- Parts
 - Spark plugs (8) (Iridium)
 - Denso – SK20R11 (10 – 12 \$ a piece) or
 - NGK – IFR6T11 (6 – 8 \$ a piece)

Spark Plugs

- Step 1 Remove plug covers

Spark Plugs

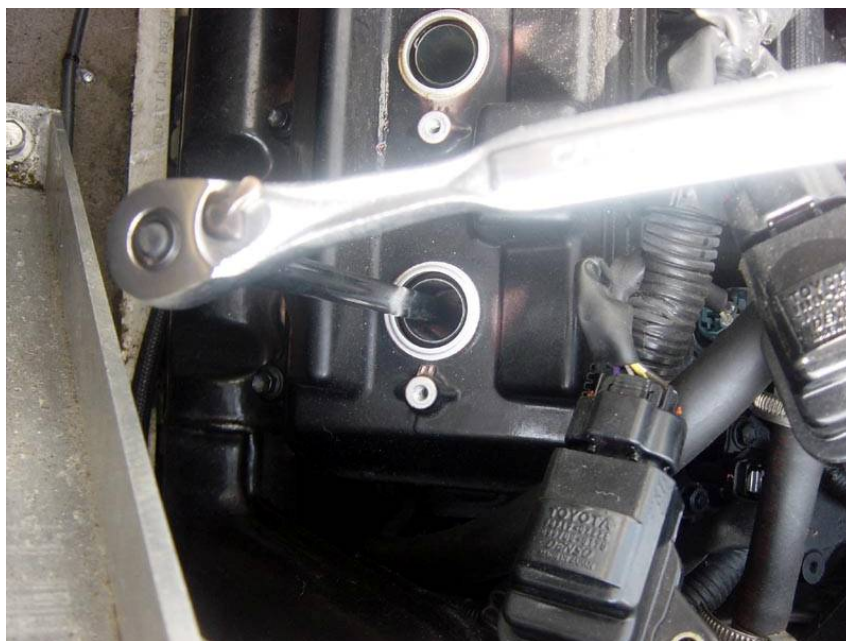

- Remove Plugs
 - Use a spark plug socket to make this easier

Spark Plugs

- Install new plugs
 - Be careful not to over-tighten the plug
 - Finger tight plus about a 1/8 of a turn

Spark Plugs

- Re-Install plug covers
- Clean-up the mess you made
- Head to the lake!

Spark Plugs

- Look familiar! (Oil in the plug cylinder)
 - You probably have a gasket that is leaking in to the spark plug cylinder. Do a search on the forum for more information on this. This is a fairly common occurrence.
