

Technical Service Bulletin 7

Tower Mounting Plates

June 2, 1999

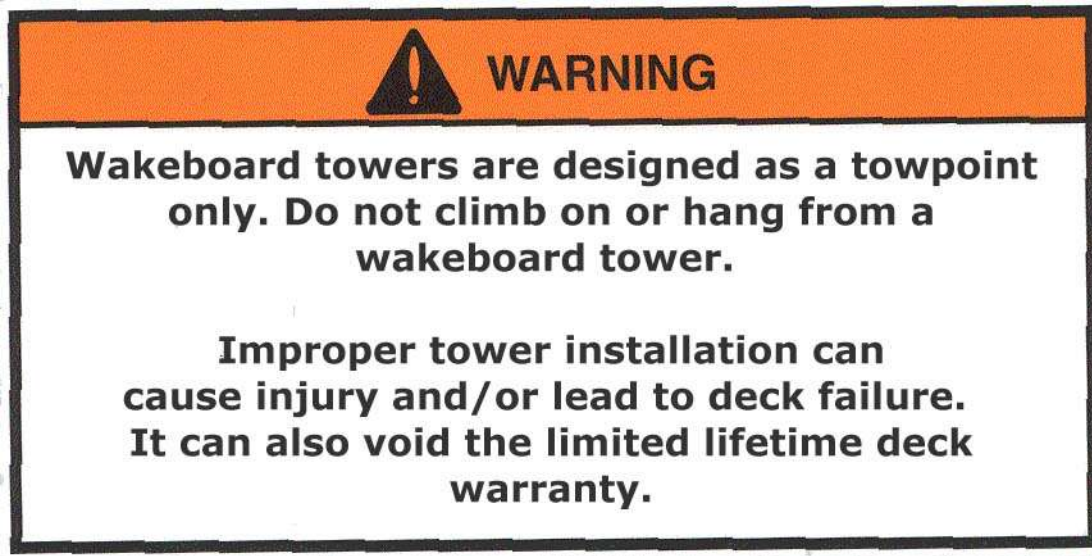

Rev Part # April 15, 2003

This bulletin affects all 1999 M.Y. Epic 22 Boats with a HIN above B121.

The design specifications for all Epic 22 boats have been modified to include a pair of aluminum mounting / backing plates integrated into the deck construction. This has been done to facilitate the installation of wakeboard towers on Epic 22's. These plates have been installed at the front mounting location only, the rear mount backing plates must be inserted at the time of tower installation.

Important Safety Information:

Wakeboard towers place an additional weight load on a boat, and can stress the deck unnecessarily if not correctly installed. It is always best to have these units installed at the factory.

MDH0011362	Backing Plate, Bow Legs, Tow Tower Install, 1-1/2"x5" w/Holes
MDH0010973	Backing Plate, Aft Legs, Tow Tower Install, 3"x8"Curved
